

Damper and Spacer in ONE

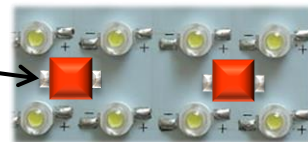

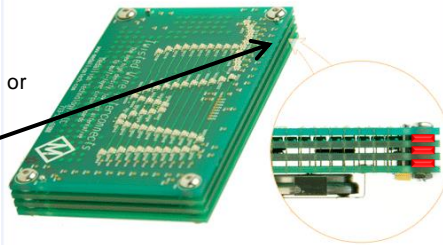

Rubber Line

Abatek SMT Damper-Spacer

Sketch side view of stack-up

Description

Damper and spacer united into ONE part

- Automated assembly - SMT on Tape & Reel and Reflow soldering
- Assembly with 12mm feeder possible
- Design freedom

Advantages

- Automated SMT assembly.
- ESD protection
- Cost efficient
- Stable positioning regardless working temperature, vibrations etc.
- Hardness can be selected
- Height can be customized
- Shape can be customized
- Standard nozzle on SMT machine
- Any color available
- Can be conductive etc.

Applications

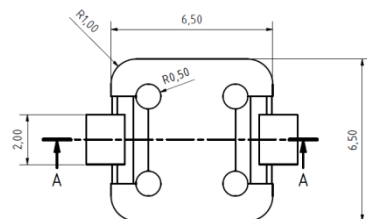

- Any application with PCB

Key Tech. Data

Dimension [mm]
Key Height [mm]
Shore Hardness [A]

- see drawing to the right
- 1.0 – 7.0
- 40 – 70
